## Lenz Hose Fittings

Hose fittings manufactured and/or sold by Lenz Inc. or related companies are **Not** to be used for life dependency applications such as diving, for oxygen, air, or other breathing applications. **None** of our fittings are designed for this type of use.

There is the possibility that the weight of a long hose line could cause the hose to pull out of the hose fitting. This could have disastrous results in a breathing application.

We specifically call your attention to the 90 through 136 Low Pressure Fittings shown in our Catalog LP-301, or revisions thereof. These fittings are intended for welding, low pressure hydraulics or pneumatics.

We therefore, do not affirm or confirm this type of use for life dependency applications, and anyone giving this impression orally, written or implied is doing so without our consent, and Lenz Inc., or any of its affiliates or related companies, assumes no liability in such cases.
